Dear Messrs. Sherwood and Stohr:

COMPLETION OF HANFORD FEDERAL FACILITY AGREEMENT AND CONSENT ORDER  
INTERIM MILESTONE M-40-14: CLOSE FERROCYNIDE UNREVIEWED SAFETY QUESTION

Reference: Postma, A. K., et al., 1994, *Ferrocyanide Safety Program: Safety Criteria for Ferrocyanide Watch List Tanks*, WHG-EP-0691, Westinghouse Hanford Company, Richland, Washington.

This letter provides notification of the completion of Hanford Federal Facility Agreement and Consent Order interim milestone M-40-14, "Close Ferrocyanide Unreviewed Safety Question."

Closure of the Ferrocyanide Unreviewed Safety Question was approved by the Program Secretarial Officer for Environmental Restoration and Waste Management, U.S. Department of Energy, on March 1, 1994. The basis for closure is provided by the reference document which is enclosed for your information. Completing this milestone is the first of two important steps in resolving the Ferrocyanide Safety Issue at the Hanford Site. The second step is to complete core sampling of the remaining ferrocyanide tanks and data interpretation of the analytical analyses. These activities are scheduled to be completed by the end of Fiscal Year 1996.
